May 4, 1998

Dear Rick Breitenbach,

It has come to my attention that the CalFed plan has some serious flaws. I would like to see no new dams, reservoirs, or canals recommended. Also, if we use the water more efficiently, we will have enough water for families, wildlife, farms, and businesses. We need a plan to restore the watersheds and groundwater basin for high-quality water and reliable water supplies. Please do not harm California's birds, wetlands, rivers and wildlife. This water is part of the Pacific Flyway and provides drinking water for two-thirds of all Californians. We need to protect and restore the Bay/Delta and the Central Valley water!

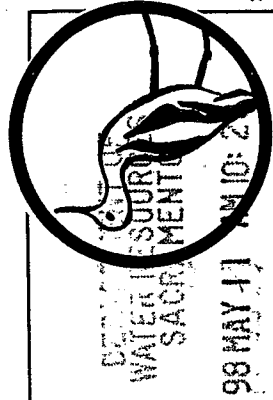

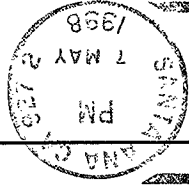

Sincerely,

Sachiko V. Fukuman, D.D.S.
